# The Galactic Photon Belt Alignment – Part 1 of 3

In 1961 astronomers discovered, by means of satellite instrumentation, what appeared to be an unusual nebula. We normally understand the nebula phenomenon as a vast cloud-like mass of

gas or dust. This one, however, appeared to have anomalous properties and was named the Golden Nebula.

What is this electromagnetic cloud, this golden nebula? Its more universal designation is 'photon belt' or 'photon band', consisting of many bands. Any encounter with this belt is recognized by extraterrestrials and advanced galactic civilizations as of great import. The more **enlightened** ETs refer to the photon belt as a 'planetary trouble shooter'. Planet Earth was in trouble from the damage incurred by our civilization and called for the photon belt—a typical emergency call procedure for planets.

But before we look at the Photon Belt in detail, let us cover some background information first.

## Cycles of Creation

Our Earth rotates around our Sun, taking approximately 365 days for one complete revolution.

Then our Sun (our entire Solar System, to be exact) rotates around Alcyone, the brightest star of the Pleiades constellation. One complete revolution of our Solar System around Alcyone takes approximately 26,000 years.

In addition, Alcyone and our Solar System are revolving around the Galactic Core (central region) or our Milky Way Galaxy. One complete revolution takes approximately 225 million years.

## The Photon Belt

*The Photon Belt is the Galactic Plane alignment of hundreds of billions of Milky Way star systems. Our solar system orbits across this Photon Belt twice in approximately 26,000 years ([Precession of Equinox](#)).*

This 'Great Crossing' thus occurs every 13,000 years. The 'Great Purification' naturally occurring at this time is the result of the surge in brilliant photonic light from the Greater Central Sun out through the conduit of the Galactic Plane Photon Belt.

There are times during our 26,000 year revolution around Alcyone, that our Solar System sits either partly or fully within the Photon Belt (referred to as periods of Light) and greater periods of time where our Solar System is not within this Photon Belt (referred to as periods of Darkness).

Due to the thickness of the Photon Belt's field, we spend 2,000 years in the 'Light', then 11,000 years in 'Darkness' then 2,000 years in 'Light' and then 11,000 years in 'Darkness' – making up our full 26,000 year cycle.

Thus every 13,000 years we reach the PEAK central region of the photon-belt of light and this coincides with the 13,000 year Stellar Cycle of our Sun.

## Movement of Our Solar System into the Photon Belt

Our Solar System is now moving into Pleiades Photon Belt once again, into another 2,000 years of 'Light'. In December Solstice 2012, our Solar System has fully entered within this Photon Belt field. Likewise, Earth is now entirely within the photon belt.

It has been intensifying for decades, changing the atmospheres on all the planets in our solar system and accelerating the rate of change in human consciousness. The global evolution revolution in consciousness with the computer/Internet revolution has actually been in resonance with the surging intelligence in the Source Field.

This photonic energy is the highest form of light that is known – the light of Source, carrying a sentient supra-conscious intelligence, coded in the frequencies just as laser light through fiber optics can carry thousands of videos and phone conversations coded in the light. Modern science has only recently 'rediscovered' what the ancients already knew. This understanding of 'Galactic Light' was known anciently to the Gnostics:

"The 2000 year old Gnostic text, discovered in Nag Hammadi Egypt in 1945, reveals the cosmic understanding that the brilliant light plasma at the central core of our Galaxy is actually a sentient

intelligence.

Furthermore, these Gnostic texts tell us that the physical world we inhabit came into form as the intelligent expression of the **plasma** light, or 'ether', spiraling out from the Galactic Central Sun." ~ excerpt from *Galactic Light*

Leading experts of both quantum science and the Mayan Calendar are saying that our DNA will be "upgraded" (coded with intelligence) from the center of our Galaxy – the 'Greater Central Sun'.

## Stellar Activations Cycle

The stellar activations have already begun and will continue through 2012 to 2017. This is explained in detail in Ashayana Deane's *Voyagers II: Secrets of Amenti*. The principle time cycle is 26,556 years, which is **the precession of the equinoxes** and is caused by a slow wobble of the Earth as it spins and orbits around the Sun. This is known by astronomers.

Stellar activation occurs when our solar system lines up with the higher frequency bands of Pleiades (star Alcyone), Sirius, Arcturus, Orion and **Andromeda**. The frequency bands then merge and pass through Earth. If Earth is out of balance within itself due to abuse from invader ETs, the Cabal, and humankind's behavior, the higher frequencies will cause an 'Armageddon'.

To understand the alignment, one could think of circles within circles (cycles within cycles) turning at different rates to which are attached magnets. Clearly, periodically they could line up, forming one long and powerful magnet. This would act like a powerful current. It is called a holographic beam since it contains the fundamental **energy** of these systems.

After the convergence, this holographic beam carries the remains of photon activity. When Earth is in alignment, it merges with higher dimensional parallel Earth, **Tara**. During this process the particles and antiparticles of these planets and their antiparallel planets are unified in certain specific ways. When these particles and antiparticles come together they create intense photonic activity which we know as the Photon Belt. It is continually renewed each cycle as the holographic beam passes out through Alcyone, leaving the band around this star.

### **What Does This All Mean For Planet Earth?**

On the solstice of 21 December 2012, our entire solar system has entered fully in the Photon Band of Light, receiving direct **energetic** transmissions from Alcyone and from our Galactic Core of the Milky Way – The Waves of Love.

In addition, we are also coming to the end of the Grand Cycle of time, the end of another 225 million year cycle, 26,000 year cycle and 365 day cycle. Thus on this December solstice there was a grand alignment in our stellar skies of the Galactic Core of the Milky Way, with Alcyone, with our Sun and with Earth – marking the end of some significant cycles of time (or frequencies of **consciousness**).

The Greater Central Sun (Galactic Core) is directly pulsing electromagnetic Wave of Love vibrations through our Central Sun (Alcyone), through our Sun and into Earth, bringing through very high pulsations or frequencies of light [energy](#) to Earth.

This electromagnetic [energy](#) is facilitating a shift in [consciousness](#), a divine shift of the level of awareness of humanity from an egoic third dimensional state of fear, to a [consciousness](#) level of Love and [Oneness](#), a [fifth dimensional](#) state of being.
