The Galactic Photon Belt Alignment – Part 2 of 3

The Galactic Center

The Galactic Center is 26,000 Light Years from the Sun, and we are merging with it now as we come to the end of the cycle. It is the cross over point, the Void, [Zero Point](#) and our Solar System ^

is moving through it as the end of the Mayan Calendar.

According to the Maya and many other cosmic cultures, the Galactic Center is where souls pass after death, and re-birthing, where time and space have collapsed totally and do not exist. It is the impulse from the Void; the universe pulses out creating life and flows in creating transformation, the cross over place.

The Galactic Center is a gateway of change. It opens us up to **multidimensional** spaces and we can access our past and future all NOW in holograms of light. The Galactic Center emits massive amounts of infra-red rays which activate us to remember our true radiance and light and ground it within us, as we open up to our **multidimensional Self** and **bodies of Light**.

The official thought is that the Galactic Center is a super-massive Black Hole. Scientists do not look at it from a **multidimensional** perspective but just a third dimensional one. They fear all is lost in a Black Hole when in actual fact everything just unifies and merges, returns through the Black Hole and then out through a White Hole of another prism of Creation.

The Galactic Center is the cross over point, black hole where we move through as we complete Duality and unify.

Zero Point

Gregg Braden is currently traveling around the United States and in the media, telling of the scientific proof of the Earth passing through the Photon Belt and the slowing of the Earth's rotation. At the same time there is an increase in the resonant frequency of the Earth (Schumann Resonance). When the Earth stops its rotation and the resonance frequency reaches 13 cycles, we will be at a zero-point magnetic field. The Earth will be stopped, and in 2 or 3 days it will start turning again in the opposite direction. This will produce a reversal in the magnetic fields around the Earth and so forth.

Geophysical Condition #1: Earth's Rising Base Frequency

Earth's background base frequency, or "heartbeat" (called Schumann Resonance, or SR) is rising dramatically. Though it varies among geographical regions, for decades the overall measurement was 7.8 cycles per second. This was once thought to be a constant; global military communications developed on this frequency. Recent reports set the rate at over 11 cycles, and climbing. Science does not know why, or what to make of it.

Gregg Braden found data collected by Norwegian and Russian researchers on this; it's not widely reported in the U.S.

Geophysical Condition #2: Earth's Diminishing Magnetic Field

While Earth's "pulse-rate" is rising, her magnetic field strength, on the other hand, is declining. According to Professor Bannerjee of the University of New Mexico, the field has lost up to half of its intensity in the last 4,000 years.

Time will appear to speed up. A 24-hour day will seem to be about 16 hours or less. Remember the Schumann Resonance (or "heart-beat" of Mother Earth) has been 7.8 cycles for thousands of years, but has been rising since 1980. It is about 12 cycles at the present. It stops at 13 cycles.

Zero Point or the Shift of the Ages has been predicted by ancient peoples for thousands of years.

Here is a YouTube video of **Zero Point** and the Photon Belt: Itasha's **Apache Wisdom Keeper-the Science of Ascension**

For the **Guardians'** perspective on **Zero Point** as translated by Speaker 1, E'Asha Ashayana Arhayas, please click here: **"FAIL-SAFE 5th Anniversary Note" - Part 2**

Photon Energy

Photons are the smallest possible particles of light in quantum physics. A photon particle is the result of a collision between an anti-electron or positron and an electron. These split second

collisions cause the charges of the particles to cancel and the resultant mass is converted into [energy](#) in the form of photons.

Photons are emitted during the transmission of one [energy](#) state to another. They have zero mass and no electrical charge. Photons are what the ancients harnessed as [energy](#) for communication, stellar travel, [energy](#) production etc.

Photon promises to be a major source for our [energy](#) requirements in the very near future.

Photon [energy](#) will provide a new and unlimited source of energy. The [energy](#) source will enable our world to easily abandon the fossil fueled industrial age. In a short period of time, our civilization can begin to rid itself of those technologies that have polluted our planet for the past two and one half centuries.

Photon [energy](#) will not only provide our bodies with a maximum efficiency of [energy](#) use, it will also do the same for our homes and factories. We will enter a new and wondrous [energy](#) age. There is also an additional benefit to this event. Space travel will become simple and the preferred mode of transportation.

In aboriginal mythology it is often stated that humans were different then than they are now and that they had a bridge to the stars. In the Photon Belt, we will be different and with the power provided by the photon beam as a propulsion system the planets and the stars will become quite near. Soon, it will be as easy to travel to Sirius or any nearby star as it is now to travel to New York.

Transformation of Consciousness

Being in the Photon Belt will play a significant role in the transformation of humankind. Both great illumination of [consciousness](#) will occur as well as great resistance to new ideas. This is a period of awakening essentially due to the [ascension cycle](#) and planetary alignment.

The phenomenon of both the Photon Belt plus stellar activity will reduce the veil stopping us from seeing who we are. It will remove some of the barriers around cells and DNA making them more reactive or responsive to new [energies](#), and in fact the DNA will attempt to respond to the changing frequencies, increasing its capacity.

It presents opportunities for change on a planet by adding new [energies](#). It increases the flow of [energy](#) in the magnetic grids of Earth, attracting new ideas and [energies](#). People will feel the need to transform but those who consider this physical reality their only expression will dwindle into greater fixations, blocks and negativity.

The Guardians, IAFW and Emerald Covenant Angelic Nations

The Interdimensional Association of Free Worlds (IAFW) was formed 250 billion years ago to serve the role of primary [Guardian Race](#) Administration and protectors of the Emerald Covenant freedom agendas in our [15-dimensional Time Matrix](#).

Throughout the many eons of intergalactic, interdimensional history, the IAFW and its countless Emerald Covenant **Guardian** Angelic Nations, continually labor to restore and maintain the structural integrity of our Time Matrix. Presently there are over 25 billion different interdimensional, interstellar Nations serving as active members of the IAFW.

The **Guardians'** association spans many different planetary, star systems, space, time and dimensions. Membership within the **Guardians** organization encompasses the matter-based galaxies and universes of the lower dimensions to the immeasurable cosmic reality fields of pure **consciousness** free from dimensional structure. They work together to assist in the evolution of developing cultures throughout the **multidimensional** Universe.

Between 2017 and 2022, when the Halls of Amenti (the blue sphere holding our divine blueprints) merge **Tara** and Earth together, those humans and **Indigos** who have assembled the fifth DNA strand and are eligible for **ascension** to **Tara** will be guided to interdimensional transportation locations to **Tara**. Those who have assembled the sixth and seventh strands may be transported to Gaia. There may be others who will be transported to their home planets or elsewhere where they play and celebrate with their Family of Consciousness. Remaining **Angelic Humans** and **Indigos** will progress in their 12 Code activation and DNA blue print activation.

Angelic humans and the races of Earth will soon be prepared for visits from the **Inner Earth** Eieyani, Sirius B Maharaji, Azurite and other Emerald Covenant Races. The **Guardians** will invite ethical Earth groups to join the Emerald Covenant, where **spiritually** mature and

virtuous humans would be offered the opportunity to reclaim their role as guardians of the Planetary Templar Complex. The first physical contacts of the Emerald Covenant Angelic Nations is scheduled between 2017 and 2022; these contacts will be made individually and privately.

Role of the Galactic Federation of Light

The Galactic Federation of Light was founded over 4.5 million years ago to prevent inter-dimensional dark forces from dominating and exploiting this galaxy.

At present, there are just over 200,000 member star nations, confederations or unions.

Approximately 40% are humanoids and the rest are varied forms of sentient beings. Most members of the Galactic Federation are fully conscious beings.

The Galactic Federation's purpose is to foster goodwill and understanding of the star nations that are answering the call of Earth's Spiritual Hierarchy to assist us in our ascension/transformation process.

Andromeda M31 Galaxy

The Andromeda M31 Galaxy is interfacing with our Milky Way Galaxy and holds very high frequencies of unified matrix of light. This is aligning us back to the higher dimensional Solar System. This is the Solar System of the Greater Central Sun, which is Sirius B, a great star that l ^

a Solar System so vast that the Solar System of the Central Sun Alcyone is on an outer orbit of it, and our Solar System is on an outer orbit of Alcyone's Solar System. The Blue Star refers to Sirius B from the Hopi Prophecy.

Our galaxy will gradually merge and rejoin the [Andromeda Galaxy](#), from which it fell out of eons ago.

There is a loop that we jump in order to move into the higher dimensional Solar System and in order to do that we have to shift our [consciousness](#). For as we align with the Sun, the Second Sun, Central Sun and Greater Central Sun, we awaken the Sun within us and the Earth herself becomes a Sun (within the next one thousand years in linear time). This is the dimensional shift, the [Golden Age](#) we are moving into. This is happening whether we like it or not. It is the completion of three grand Cycles, and is like trying to stop night and day from happening. So we open to the flow and move with it, or resist in fear and stay stuck in the third dimension for eons more time.
